

Specialized Accessibility and Assisted-care Equipment

These are specialized products that help make care facilities and other accessible environments safer and more practical for caregivers and people with reduced mobility.

Specific Product	How It Assists Users
<u>Pressalit SCT 3000 powered adult change table</u>	Provides powered height adjustment, a safety rail and a secure surface for assisted changing or showering of adults and children with reduced mobility.
<u>Can-Dan mobile electric height-adjustable change table</u>	Can be moved between care areas and raised to a comfortable working height for caregivers. It supports up to 450 lb.
<u>Koala Kare KB2600 adult changing station</u>	A wall-mounted, electrically height-adjustable station designed for safe transfers and dignified assisted changing in accessible public washrooms.
<u>Bobrick B-918116 bariatric folding shower seat</u>	Provides supported shower seating for larger users and people who cannot safely remain standing. It has swing-down legs and a 1,102 lb capacity when properly installed.
<u>Frost 1055 flip-up safety rail</u>	Gives wheelchair users and people with limited strength a stable support beside the toilet while folding away to preserve the transfer area.

Specific Product	How It Assists Users
<u>Bobrick B-5892 padded toilet backrest</u>	Provides positioning and back support on tankless toilets in barrier-free and universal washrooms. It also incorporates a stainless-steel support rail.
<u>Bobrick B-293 fixed tilt mirror</u>	Angles the mirror downward so it can be used comfortably by wheelchair users and people who cannot stand directly in front of a conventional mirror.
